

# ACCELERATE TELEHEALTH

WITH CONFIDENCE USING FRICTIONLESS MANAGED SD-WAN

## Physicians are Overburdened

## Telehealth Saves Time, Increases Productivity

## Government is Bolstering Telehealth

The Centers for Medicare and Medicaid Services is expanding telehealth to **80 new services; Looser restrictions to benefit 40 M US seniors under traditional Medicare**

## Telehealth Expands Revenue BUT Needs a High-Quality, Low-Latency, High-Capacity Network for it to Work

Networking Challenges with Telehealth	Managed SD-WAN Creates a Seamless Connected Experience for Healthcare Providers and Patients
<p>Network outage means critical patient care can be compromised</p>	<p>Automatic site failover provides uninterrupted connectivity with patients</p>
<p>Inadequate bandwidth for quality video and voice experiences</p>	<p>Intelligent traffic management ensures crystal clear voice and video quality for telehealth visits</p>
<p>Distributed points of care often lack on-site IT staff</p>	<p>Network-as-a Service solution requires no local IT skills; MSPs manage connectivity and perform troubleshooting</p>
<p>Network connectivity at a new site or increasing bandwidth at an existing site can be costly and fraught with delay</p>	<p>Multi-link aggregation capability combines broadband links from any ISP into a faster and more reliable site connection; Also saves costs</p>
<p>Remote access to patients, their medical records, and cloud applications is not available</p>	<p>Flexible, always-on connections provide access to cloud and private network locations while allowing high-quality voice/video discussions between patients and medical professionals</p>

## Make telehealth frictionless with Adaptiv | SD-WAN

Adaptiv | SD-WAN is the simple managed-network solution geared for complex telehealth networks.

## Building a Digitally Connected Healthcare Office of the Future?

Get Adaptiv | SD-WAN to ensure you are always connected.
